

The following is a list of activities and events commemorating the 200th anniversary of the Lewis and Clark Expedition in 1803-1806. Websites are noted for more and current information about dates and events for participants in the journey, and river and boater users to use in planning their activities as potential river use increases during this national event. Safety is a primary concern during this exciting national commemoration of the U.S. Army Expedition as it traveled down the Ohio to the Western Wilderness.
